

LADDERFRAME ADVISORS LLP

Purpose of This Document

This document captures the positioning narrative - identity, client problem framing, and service articulation.

1.1 Brand Story

The Name

The name LadderFrame carries the entire philosophy of the firm in two words.

Ladder — ascent, ambition, the courage to rise. The ladder is the founder's journey: upward, step by step, driven by vision and will.

Frame — stability, design, and the system that makes the climb possible. The frame is what holds the ladder steady: operating architecture, sales structure, execution rhythm, strategic clarity.

Core Belief - Most businesses don't stall because of a lack of ambition. They stall because ambition outpaces architecture and well defined processes & structure. They scale fast, hit complexity, operational strain, and fragmented priorities. What they need is the architecture.

***A ladder without a frame collapses. A frame without a ladder goes nowhere.
LadderFrame brings both.***

Growth isn't random. It's engineered.

Tagline

Where Ambition Meets Architecture.

Structured Growth. Sustained Momentum.

1.2 The Problem We Solve

Four recurring patterns stall growing businesses. LadderFrame helps solve all four.

Growth without structure	Revenue grows but processes don't. The founder becomes the bottleneck. Every new client adds chaos, not scale.
Margins under pressure	Profitability erodes quietly as the business grows. Pricing is intuitive, not strategic.
Expansion without a map	New markets, segments, and service lines pursued on instinct rather than a validated, de-risked roadmap.
Sales that can't scale	Relationships carry all the revenue. No structure, no pipeline visibility, no repeatability beyond the founder.

1.3 Three Pillars

01 — Scaling SMBs & Tech Businesses

We design operating frameworks, improve margins, and build execution rhythms that support intelligent, predictable scale for growing businesses.

02 — Fractional CxO Ecosystem

A collaborative ecosystem of experienced CxOs who step in as fractional leaders — bringing top-tier strategic depth without full-time overhead.

03 — Startup Growth Partnership

We support early-stage founders beyond advisory — GTM design, product refinement, partnerships, and fundraising. A long-term relationship, not a project.

1.4 Our Services

1. Strategic Growth Advisory

Growth roadmap, market prioritization, sales process design, pricing and margin optimization, revenue analytics.

2. Sales Org Design & Enablement

- Sales Org restructuring, sales runbook, Inside Sales setup, OKR design.
- Build Large Deals capabilities

3. AI Advantage for SMBs

AI usage, AI narrative and revenue strategy, use case identification, delivery model design, AI-enabled service offerings, workflow automation.

4. Expansion & Transformation

Forward integration strategy, market entry, partnerships and alliances revival, M&A and acquisition support.

1.5 Elevator Pitch

I work with founders to build the operating architecture their business needs to scale - the systems, the sales org, the strategy, and the right team around them. *(Revenue is up, but the structure hasn't kept pace. Sales depends too much on the founder. Margins are under pressure. The next market is on the whiteboard but never gets executed.)*

I do this through LadderFrame Advisors — as a working partner, advising and monitoring the execution till the founder and team can do it independently.

1.6 The Engagement Model

Four phases. Typically 3–4 quarters of intensive engagement followed by light-touch ongoing relationship.

Phase 1	Diagnose & Align (4–6 weeks) — Deep dive to understand the business, the founder, the team, the gaps. Agree on the roadmap. Define what self-sustaining looks like for this specific business.
Phase 2	Build & Enable (2–3 quarters) — Work alongside the founder and team to build structures, systems, and capabilities. The key word is alongside. The team learns by doing. The founder leads the change.
Phase 3	Stabilise & Hand Over (1 quarter) — Systems running. Team executing. Founder leading confidently. Structured handover
Phase 4	Light-Touch Monitoring (ongoing) — Monthly or quarterly check-ins. Performance against the framework built together. Course correction when needed. Maintain the relationship.

1.7 Who LadderFrame Serves

Sweet Spot

- Founder-led or leadership-driven businesses at a growth inflection point — where growth has outpaced structure.
- Revenue between ₹10Cr and ₹200Cr
- IT SMB companies between 100 Mn to 500 Mn for Large Deals

SMBs & Mid-Market	Any sector. The common thread is stage, not sector. Growth has outpaced structure.
Technology Businesses	IT Services, IT Products, SaaS, digital-first companies.
Pharma Retails and Distribution	Forward integration, margin improvement, market expansion.
GCCs	Setting up, scaling, and commercialising Global Capability Centres.

1.8 Large Deal Capability

Large deal pursuit is one of LadderFrame's most differentiated capabilities.

Most SMBs and mid-market businesses either lose or do not get invited to large deals not because their solution is inferior but because they don't know how to construct, position, and pursue them.

This sits inside the Sales Org Design & Enablement practice as a specialist capability activated when a client is ready to move upmarket.

Moving upmarket	An SMB winning ₹50L deals wants to pursue ₹5Cr deals. The sales motion is completely different. LadderFrame builds that capability.
One transformative deal	Sometimes one large deal changes the trajectory of a business entirely. LadderFrame can sit alongside the founder in that room.
Building a pursuits function	As part of sales org design, LadderFrame can help a growing company build a formal large deal pursuit team.

I've structured over 50 complex enterprise engagements worth \$2B+ in lifetime value. I bring that discipline — either as one-time deal support or as part of building a proper pursuits function.
